

CAREER OPPORTUNITIES

Designing the future of medicine. With you.

We are a young, innovative company in the medical technology software field. The company is a spin-off from the University of Basel. A small, highly motivated team with big goals provides the ideal environment to get involved and develop. A high degree of independence and self-organization together with very short decision-making paths makes us fast and flexible. We are open for creative input and looking forward to build something new.
